To Warm Wipes:

• Plug transformer into a standard household 110-120 volt AC outlet. Do not plug into a 220 volt AC outlet. The power indicator light will come on when functioning properly and the unit will begin warming.

• Use only with a Class 2 Adapter.

• Use is intended to keep wipes warm for comfortable diaper changes. Wipes are not intended to reach a "HOT" temperature.

• Use in accordance with specific manufacturer's directions.

• To prevent energy waste and unplugging unit during prolonged periods of non-use.

Cleaning and Care:

• Always unplug unit from power source and ensure that it is cool before cleaning.

• Remove wipes and wipe unit with a non-abrasive cloth.

• To prevent mold growth, always drain water in unit when not in use and allow fresh air to circulate inside of unit until completely dry.

To De-Scale:

• It is helpful to de-scale your Mist™ Wipe Warmer every four weeks to ensure that it continues to work properly.

• Do not start unit when de-scaling.

• To de-scale, mix 1.75oz. (50ml) of white vinegar with 1.75oz. (50ml) of cold water and pour into the water reservoir. Avoid contact with eyes as this may cause irritation. Allow liquid to stand in the unit until any deposits have dissolved. Drain liquid and rinse with clear water. Wipe with a non-abrasive cloth. (You may use any other non-abrasive cloth available.)

Caution—electrically operated product:

• Do not use with extension cords. This is not a toy. Adult use only.

• Do not start unit when de-scaling.

• Do not unplug unit from power source.

• Do not immerse unit in water.

• Do not immerse unit in water.

• Do not immerse unit in water.

Assembly Instructions:

• Remove water reservoir packed on top of unit. Be sure to save the original package, Fig. 1.

• Fill water reservoir (see instructions below) Fig. 4.

• Use 100% filtered or distilled water.

• Place lid on reservoir. (Fig. 2).

Use Instructions:

• To Load and Use Wipes:

• To refill water reservoir:

• Do not start unit when de-scaling.

• To de-scale, mix 1.75oz. (50ml) of white vinegar with 1.75oz. (50ml) of cold water and pour into the water reservoir. Avoid contact with eyes as this may cause irritation. Allow liquid to stand in the unit until any deposits have dissloved. Drain liquid and rinse with clear water. Wipe with a non-abrasive cloth. (You may use any other non-abrasive cloth available.)
